CEO HSE MESSAGE 2024:

SAS will continue to conduct its business with high priority on HSE in 2024. The Aim for 2024, to achieve zero harm to people, damage to assets or impact on environment. 2023 has been great, however SAS will still strive to even perform better in 2024 and sustain good the outstanding performance . The goal is; free LTI and sustain "and improve" current HSE performance in all aspects.

The focus will be in areas including:

Welfare of staff /work force, Boots on Ground ,Stop Work Authority , Individual responsibilities Competency of our resources, while we will support the staff at the same time; we will aim to an enable them, Action on action, Management feasibilities, Learning from Incidents, Adopt new Game Changers, Appreciation and recognition of good performer, Continue in reduction of IVMS violations, Meeting clients' expectations and continuation engagement with relevant stake holders.

P6

Engr. Said Al Asmi

THE ULTIMATE GOAL IS TO CONTRIBUTE TO VISION 2040 OF THE COUNTRY.

MEETING THE SHAREHOLDERS OBJECTIVES BY CONVERTING THE VISION INTO REALITY. WE SHALL STRIVE TO WORK TOGETHER AS ONE TEAM TO OPERATE RESPONSIBLY BY SUPPORTING OUR COMMUNITIES WITH AN AIM TO ACHIEVE THE DESIRED OUTCOMES. WE WILL DELIVER EXCELLENCE TO OUR CLIENTS THROUGH OUR COMMITMENT BY ACHIEVING PROJECT SCHEDULES WITHOUT INCIDENTS OR ANY KIND OF VIOLATION TO HSE REQUIREMENTS AND AT THE SAME TIME SUSTAIN HIGH QUALITY RESULTS.

Approach:

- Enhance good practice to close any gap in the current business.
- Gaining more Contracts in the current business.
- Explore diversification or more opportunities in other areas.
- To work for the vision of the Company, hence the country.

Key Focus Areas: HSE

HSE – Ensuring Safety is our primary goal in every stage of our business. We practice and promote HSE to our Stakeholders on a continuous basis. It is our drive to achieve Goal Zero with No Harm to people, environment and asset damage in our organization. We promote and nurture a strong safety culture through HSE awareness workshops for our teams and walk the talk.

QUALITY

We continuously strive to achieve improvement in quality of our systems, products and services and we ensure successive inspection at every stage to boost Quality to the next level. SAS fosters a culture of Integrating safety and quality to go hand in hand in order to ensure 'Safety First' while also promoting continuous checks on doing it right the first time with no errors and this way to be at par with the competitive market by providing customer satisfaction. It is noteworthy that, SAS has formulated a comprehensive Quality Management system which is in line with the requirements specified in ISO 29001:2020 and ISO 9001:2015.

Timely Delivery

We delivery projects responsibly and we do not compromise in our commitment towards HSE and Quality while delivery projects on time. Delivering consistent performance by implementing adequate technology as applicable.

Explore Business opportunities

SAS continues to strive for business opportunities locally and in GCC with aim for diversification and expand the current core business. Hence several MOUs have been signed and discussions are on-going with partners.

” Sustain improved relations with stakeholders and work as partners to reach a win-win situation with high standard to continue elevating SAS position in Oil and Gas sector as well as in other areas of business.

The participation of Seeh Al Sarya in Oman Quality Conference 2023

Seeh al Sarya

Engineering LLC (SAS) was proud to participate in Oman quality Conference 2023. The event was a significant assembly of quality professionals from across the quality fraternity in the Oil & Gas sector from Oman and overseas. The event was hosted by Petroleum Development Oman & organized by Raya Services during 14-12 November 2023. The objective of the event was to exchange experiences & ideas among participants, professional relationships with specialists in quality management, and learn about products & services that could contribute to improving the quality of operations in the energy sector.

SAS partnered Petroleum Development Oman as a Silver Sponsors and had the privilege to set up a Stall to exhibit our credentials and contributions in our North Oman operations to the leading Oil and Gas industry. Booklets, presentations, videos, photographs etc were on display at the Stall.. Our experienced personnel including Lean Manager Mr. Tahir Al Barwani, Inspection Engineers Mr. Abdul Majeed, Mr. Bader Rashid Qutaiti and Mr. Omar Rashid Al Abri demonstrated our capabilities and expertise to the Visitors.

The theme of the event was "Working towards a quality driven future."

Our CEO was appreciated by the host PDO and received a token of appreciation from His Excellency for the contribution towards Oman Quality Conference.

The Conference was inaugurated by His Excellency (HE) Engineer Saeed bin Hamoud Al Maawali, Minister of Transport, Communications and Information Technology. His Excellency paid a visit to our Stall during the inauguration ceremony.

Our CEO Engr. Said Rashid Al Asmi took the opportunity to introduce our organization and explained our business, the core activities, the achievements including the initiative towards sustainable In-Country Value (ICV) objectives. HE excellency patiently listened to the narration and acknowledged all the achievements.

Quality improves Effectiveness.

Phil Crosby

One of the presenters was our own QA/QC Engineer, Omar Al Abri, who presented 'Applying Lean Six Sigma principles in Quality Management System' Which was widely appreciated.

The event continued with subject matter experts from the Oil & Gas sector presenting and discussing the latest developments, trends, and best practices in the field of 'Quality Management'.

"Quality is the best business plan"
Phil Crosby

Quality is of utmost importance in the oil and gas sector as it is crucial to ensuring safe, reliable, and efficient operations. Poor quality can lead to accidents, equipment failures, & environmental damage, which can have serious consequences for the industry, the environment, and the society at large. Therefore, it is essential to maintain high-quality standards throughout the entire value chain, from exploration to production to refining and transportation.

"Quality is the best business plan"
Phil Crosby

Blood Donation Campaign

a recent voluntary blood donation campaign initiated by Seeh Al Surya Engineering LLC In an effort to support the required national programs and social security institutions, our company has implemented a campaign that aims to promote community solidarity and social cohesion.

Through this campaign, we aspire to contribute towards the sustainability of national programs and social security institutions at both the Swedish and global levels. By encouraging and facilitating voluntary blood donations, we strive to strengthen the sense of solidarity within our society. Seeh Al Surya believe that this initiative will make a significant impact in bolstering community support and ensuring

the well-being of individuals across various communities. As seeh alsarya are grateful to all the participants who have joined us in this noble cause.

The International College of Engineering and Management is the oldest specialist college of its kind in the GCC with internationally recognised higher education and vocational training, providing an unrivalled student experience using highly sophisticated and specialist resources.

As a unique provider of very applied and vocational undergraduate education and training in the GCC, we are very proud that our graduates and trainees are highly valued by industry. On completion of their courses they leave us very well equipped for first-class careers in the global market. In addition to a bachelor's degree from an internationally recognised UK university, our graduates get the opportunity to enhance their CV with industry standard certification.

12th UON & industry engagement program

Seeh Al Sarya Engineering LLC participated in the program that is foster meaningful connections and collaboration between the students at university of Nizwa and professionals who have extensive expertise & experience in the industry like seeh alsarya. the purpose of the UoN & industry engagement program is twofold:

Facilitate networking opportunities: the program aims to provide a platform for UoN students to interact with professionals from various sectors. UoN believed that connecting with industry experts like seeh alsarya can offer valuable insights. And mentorship.

DID YOU KNOW THAT... Petroleum is older than dinosaurs.

Petroleum is made up of hydrocarbons that were originally formed from the remains of ancient plants and animals. In a process that takes millions of years, the combination of underground heat & pressure transforms hydrocarbons into petroleum.

Our Mechanical Oil & Gas unit has experienced multi discipline workforce and have executed EPCC projects & service contracts of major O&G Clients of Oman. This unit has successfully completed both On plot & Off plot works encompassing

Few commodities have shaped our world and advanced civilisation as profoundly as oil and gas. In 2021, the oil and gas industry boasts a colossal market size of \$2.1 trillion, comprising around 3.8 per cent of the global economy. Oil alone

powers a third of the world's energy production – far more than any other commodity – making it a lifeblood of the global economy.

participated in the ADIPEC expo in Abu Dhabi from October 2 to October 5. This kind of exposition

adds to the event by providing a forum for businesses, industry professionals, and experts to interact and discuss the newest developments, innovations, and trends in the oil & gas industry. ADIPEC addresses several industry-related topics, including as distribution, production, refining, and exploration.

DID YOU KNOW THAT...

Most oil found in the ocean has oozed naturally from the ocean floor. The ocean floor is the ideal place for oil to form, over the course of millions of years. It acts as a vast landing pad for dead animals and plants (most things that die in the ocean eventually sink to the bottom) and the ultimate resting place for dead matter from land that has been swept into the ocean.

MDEM Meeting

It's the MDEM meeting. Monthly Department Engagement meeting with HODs and Managers

CEO meeting with HSE

the regular meetings that our CEO has with the HSE department. These meetings are a testament to his unwavering interest and the significance he places on this department.

During these meetings, our CEO engages in discussions with the HSE team members both at the main office and on the job site. The meetings provide a platform to address crucial subjects that impact our organization. These discussions range from performance monitoring to addressing any concerns or issues that may arise. It is important for all staff members to understand the importance of these meetings and actively participate.

Regular Meeting

The CEO of the company presides over the periodic meeting of the department managers to review the progress of the work of the departments in the main office and the work sites in the desert, present the challenges, discuss the company's general law, and draw a road map to present the work tasks carried out by the departments of the company. Administrative communication serves as a mechanism for interaction and dealings within the work environment, focusing on job tasks. It encompasses various forms of communication, involving managers, employees, and other parties in the work relationship. Its primary objective is to ensure a smooth workflow, enhance productivity, & promote flexibility in performance.

This is an opportunity for us to provide updates on our progress, seek guidance, and contribute to the overall growth and success of our organization.

The regular meetings that our CEO has been conducting with department managers throughout the year. These meetings have proven to be instrumental in fostering effective administrative communication within our company. To further enhance our administrative communication, there are certain tasks that require our attention. It would be beneficial to provide opportunities for open dialogue, encourage feedback from all parties involved, establish clear channels of communication, and implement effective communication tools and technologies.

By prioritizing and improving our administrative communication, we can collectively contribute to a more efficient and harmonious work environment.

“ As a recognized Engineering LLC, SAS is committed to building quality projects while sustaining lifelong partnerships. ”
