DID YOU KNOW THAT...

Oil is used to create a multitude of products
Oil is used to create a whole host of products, including plastic bottles, pens, fertilizers and clothes. When learning about oil, you realise that it is a substance that is in most products. Largely, the quantities of what oil is used to create are dictated by market demand. Therefore, it varies from year to year, or even month to month, as oil refineries create different types of oil to satisfy consumer wants.
